CSI CREATION SCIENCE CAMP 2009

EXPLORING THE WORLD OF SCIENCE THROUGH A BIBLICAL PERSPECTIVE

July 6-10 Physics of Fun

Description:

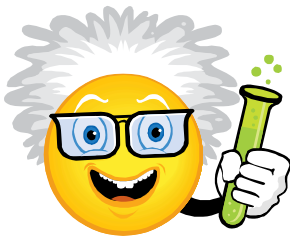

Who doesn't love to play with toys? Did you know there is a science behind the way a toy works (or doesn't work)? This week will give you the opportunity to learn about principles in physics such as inertia, kinetic energy, laws of motion, and others. Come join us and see how learning physics can be lots of fun!!!

July 13-17 Creepy, Crawly, Critters

Description:

Explore the tiny creatures of this world. From butterflies, to spiders, to beetles, even the invisible microbes, and last but not least the roaches of the world. The students will find these creatures amazing as they get to touch and see what God has uniquely created.

July 20-24 Weird & Wacky Science

Description:

Dive into chemistry and see what it has to offer! Get ready to experiment with many different physical changes from solid to liquid to gas. Discover how some solids phase right into gas. Oil and water don't mix, right? Let's see how you can make them mix, even if they don't want to.

July 27-31 Creation Week

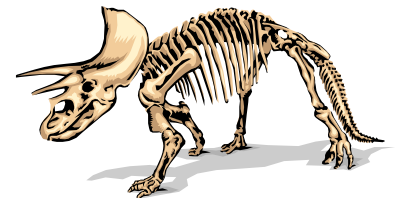

Description:

Discover what happened in the beginning of time. We will be taking a journey back to Genesis when God first created EVERYTHING! Day by Day you will see some of God's most precious creations. From light to the smallest creature come explore the days of creation.

August 3-7 Paleontology Exploration

Description:

From the field to the laboratory, campers will be introduced to how fossil are formed, identified, prepared for transport, and fragments pieced together to form complete fossils.

August 10-14 Weather or Not

Description:

Wind, rain, sunny or cloudy days, hurricanes, or tornados, it all adds up to the weather. People can try to predict what the weather will be, but God is in control of it. Remember how God asked Job if he knew where the snow or the hail came from? Take a journey exploring God's weather.
